

SUCTION ROLL AIR LOAD TUBES AND ACCESSORIES

Coldwater: engineering simple solutions for your Air Load Tube applications.

Coldwater can provide all of your air load tube needs. Including finished assemblies or components to build your own tubes.

Ferrules are available in stainless steel in addition to our standard brass and nickel plated brass.

- All major OEM sizes
- "Blue Vincon" and Neoprene Tubing
- Fittings available in Brass or 316 stainless steel
- Spaghetti tube and closed cell foam side seals
- Rubber strips for load tube protection
- Crimpers, dies and accessories for tube assembly

Without Shrink Tubes

With Shrink Tubes

Excessive load tube pressure will cause over expansion of the tube in the relief notches of the seal. This is a common condition for tube failure. Coldwater Shrink tubes eliminate this problem.
