

The image shows several long, dark grey PV-2000 seals and a circular ring. The seals are arranged in a fan-like pattern, with some overlapping. The circular ring is positioned in the upper left quadrant. The background is a gradient of yellow and blue.

PV₂₀₀₀

Seals Designed for Vacuum Felt Rolls and Pocket Ventilation Rolls.

PV-2000

is a high temperature phenolic resin with woven organic reinforcement and graphite. PV-2000 can be used as a seal along the length of the roll between the inner box and the shell or as a deckle to divide up different chambers or seal the ends.

FEATURES:

- Able to operate continuously above 250°F/121°C (Maximum 285°F/140°C).
- Dimensionally stable at operating temperature.
- Low coefficient of friction.
- Low coefficient of thermal expansion, similar to steel.
- Teflon rings / deckles also available.

The logo consists of a blue circle with a white stylized 'C' inside, followed by the word 'COLDWATER' in a bold, blue, sans-serif font.
