

Air Load Tubes & Accessories

Excessive load tube pressure will cause over expansion of the tube in the relief notches of the seal. This is a common condition for tube failure. Coldwater Shrink tubes eliminate this problem.

Coldwater can provide all of your air load tube needs.

Including finished assemblies or components to build your own tubes.

- All major OEM sizes
- "Blue Vincon" and Neoprene Tubing
- Fittings available in 316 stainless steel or nickel plated brass
- Spaghetti tubing and closed cell foam side seals
- Rubber strips for load tube protection
- Crimpers, dies and accessories for tube assembly
