

Wilbanks Ceramics, Exclusively from COLDWATER.

Coldwater/Wilbanks Ceramics consistently withstand the most demanding processing conditions and won't sag, crack or deteriorate when attacked by the aggressive chemicals, abrasives or debris often present in the papermaking process.

When you compare our ceramic performance and track record in the industry, there's really no comparison. Coldwater/Wilbanks ceramics run longer and more reliably.

Coldwater has joined forces with Wilbanks Ceramics to offer your mill a complete line of Ceramics for more reliable performance. With over 35 years of advanced ceramics experience, our Wilbanks line of high purity ceramics includes all standard materials for every major OEM design and applications such as Forming Boards, Foils, Suction Box Covers, Twin Wire Elements, Uhle Strips, and Cleaner Cones.

Improve your drainage system's performance and product quality today with Coldwater/Wilbanks rugged and extremely wear-resistant ceramics. Plus, special designs are available upon request.

Coldwater/Wilbanks Ceramics: proven leaders with the most reliable and innovative products in the industry, all made in the USA.
